 FSP license no: 720**

Fund profile

The primary objective of the portfolio is to obtain a high level of current income, primarily in the form of dividends but may also include interest, as is consistent with capital preservation and liquidity. Capital gains will be of an incidental nature. The portfolio will be permitted to make investments in any securities and non-equity securities that generate a return (whether by way of interest, dividends or otherwise) and which may be included in a portfolio in terms of the Act and relevant legislation. The manager may from time to time invest in participatory interests and similar investment schemes.

The portfolio may be capped from time to time in order to be able to manage the portfolio in accordance with its mandate.

Key features

The Fund offers a regular income in the form of dividends and will have a similar risk profile to that of money market unit trusts. The fund will to a large extent track the local interest rate cycle.

The risk profile of the fund is low and the minimum rating for Institutions is A1.

Who should invest?

- Investors seeking an alternative to interest income such as dividends but at the same time with minimum risk to their capital.
- Investors who wish to diversify their total investment portfolio to reduce total portfolio risk.

Performance objective

The primary performance objective of the portfolio is to obtain as high a level of current income as is consistent with capital preservation and liquidity. Capital gains will be of an incidental nature. The aim is top quartile performance in its category.

Institutional Credit Risk Exposure

Unit trusts should be considered medium- to long-term investments. The value of units may go down as well as up. Past performance is not necessarily an indication of future performance. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing up to 10% of the market value of the portfolio to bridge insufficient liquidity. Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (permissible deductions may include management fees, brokerage, UST, auditor's fees, bank charges, trustee fees and RSC levies) from the portfolio, divided by the number of participatory interests in issue. Funds are valued daily at 15:00. Instructions must reach us before 14:30 (11:30 for Money Market) to ensure same day value. Income tax legislation is subject to amendment and any such changes could affect the tax status of future dividend income distributed by the Gryphon Dividend Income Fund. A review into Dividend Income Portfolios is currently underway, the outcome of which may result in such Funds having to unwind. A schedule of fees, charges and commissions is available on request. Commission and incentives may be paid, and if so, are included in the overall costs. Forward pricing is used. Performance figures are quoted from MoneyMate for lump sum investments using net asset value prices, with income distributions reinvested. Coris Capital Collective Investments is a member of the Association of Collective Investments.
